| Issue Date:          | April 27, 2026                                  |
| Submission Deadline: | May 20, 2026 at 4:00 PM Sri Lanka Standard Time |
| Project Name:        | Confidential Multi-Vendor Clothing Platform     |
| Issued by:           | Mark & Comm (Pvt) Ltd on behalf of Client       |

## 1. PROJECT OVERVIEW

### 1.1 Background

Mark & Comm (Pvt) Ltd, on behalf of our client, is seeking qualified technology partners to develop a comprehensive, scalable multi-vendor e-commerce platform for the clothing and fashion industry. This platform will serve as a marketplace connecting multiple independent vendors with end customers through a unified, high-performance digital experience.

Please note: Proposals will be reviewed on a rolling basis, and the opportunity may be filled before the stated deadline if a proposal closely matches our requirements.

### 1.2 Objective

To build a proprietary, enterprise-grade multi-vendor platform from the ground up that delivers exceptional performance, security, and user experience while supporting complex marketplace operations at scale.

### 1.3 Project Scope

Development of a complete e-commerce ecosystem including vendor management, customer-facing storefronts, order processing, logistics integration, financial settlement systems, and comprehensive analytics capabilities. Complete UI/UX design specifications have been finalized and will be provided to the selected vendor.

## 2. TECHNICAL REQUIREMENTS

### 2.1 Platform Architecture

The platform must be built as a bespoke, proprietary solution (not utilizing off-the-shelf platforms such as Shopify, WooCommerce, or similar) with the following characteristics:

- Scalable Architecture: Capable of supporting growth from initial launch through enterprise-scale operations
- High Performance: Optimized for fast load times, concurrent user handling, and transaction processing
- Security: Enterprise-grade security implementation including PCI DSS compliance for payment processing
- Modern Development Standards: Clean, maintainable codebase following industry best practices

## 2.2 Technology Stack

Proposals should utilize or justify equivalent alternatives to:

- Frontend: Next.js or comparable modern React-based framework
- Backend: Node.js or equivalent high-performance server environment
- Database: PostgreSQL or comparable relational database with real-time capabilities
- Hosting & Infrastructure: Cloud-native architecture (AWS, Google Cloud or equivalent)

## 2.3 Design Implementation

Complete UI/UX designs have been finalized and include:

- Full user journey wireframes and mockups
- Design system with component library specifications
- Responsive layouts for desktop and mobile devices

The selected vendor will be responsible for accurate implementation of these designs while ensuring optimal performance and adherence to web standards.

## 2.4 Core Platform Features

### Vendor Management System

- Vendor registration, onboarding, and profile management
- Product catalog management (unlimited SKUs, variants, inventory tracking)
- Order management and fulfillment workflows
- Vendor-specific storefronts and branding capabilities
- Multi-tier vendor access controls and permissions

### Financial & Settlement System

- Flexible commission structure configuration (percentage-based, fixed-fee, tiered)
- Automated financial calculations and settlement processing
- Configurable payout schedules (automated or vendor-initiated withdrawal)
- Comprehensive transaction ledgers and financial reporting
- Multi-currency support and tax calculation integration
- Secure payment gateway integration (support for multiple providers)

### Delivery & Logistics Management

- Multi-courier API integration (minimum 3-5 major carriers)
- Automated shipping rate calculation
- Real-time shipment tracking and status updates
- Return and exchange management workflows
- Address validation and delivery zone management

### Customer Experience Features

- Responsive, mobile-optimized shopping interface
- Advanced product search and filtering capabilities
- Smart product recommendations engine using behavioral data
- User accounts with order history and wish lists
- Multiple payment method support
- Guest checkout capability

### Marketing & Retention Tools

- Automated abandoned cart recovery system
- Built-in loyalty/rewards program framework

- Promotional campaign management (discounts, coupons, flash sales)
- Email notification system integration
- Customer segmentation capabilities

### **Analytics & Reporting**

Comprehensive vendor analytics dashboards including:

- Sales performance metrics
- Product performance analysis
- Customer behavior insights
- Financial summaries and payout tracking
- Platform-wide administrative analytics
- Customizable report generation
- Data export capabilities

### **Administrative Functions**

- Centralized platform management dashboard
- Vendor approval and moderation workflows
- Content management system for static pages
- System configuration and settings management
- User role and permission management

## **3. PROPOSAL REQUIREMENTS**

### **3.1 Company Information**

- Company profile, registration details, and years of operation
- Relevant experience with multi-vendor platforms or complex e-commerce solutions
- Team composition and key personnel qualifications
- Portfolio of similar projects (case studies preferred)
- Experience implementing designs from existing UI/UX specifications

### **3.2 Technical Proposal**

- Detailed technical architecture and system design approach
- Technology stack justification (if deviating from specified stack)
- Approach to implementing provided UI/UX designs with pixel-perfect accuracy
- Development methodology (Agile, Scrum, etc.)
- Security and data protection measures
- Scalability strategy and infrastructure approach
- Third-party integrations strategy (payment gateways, courier APIs, etc.)
- Quality assurance and testing methodology
- Cross-browser and device compatibility strategy

### **3.3 Project Plan**

- Detailed project timeline with key milestones
- Phased delivery approach (MVP, subsequent releases)
- Resource allocation and team structure
- Communication plan and project management approach
- Risk assessment and mitigation strategies
- Design review and approval process

### **3.4 Commercial Proposal**

- Detailed cost breakdown by development phase/module
- Payment terms and schedule
- Ongoing maintenance and support costs
- Hosting and infrastructure cost estimates (if included)
- Licensing terms for developed software
- Warranty and post-launch support provisions

### 3.5 Post-Launch Support

- Maintenance and support service level agreements (SLAs)
- Bug fixing and issue resolution processes
- Feature enhancement and update procedures
- Training and documentation provisions
- Emergency support availability

## 4. EVALUATION CRITERIA

Proposals will be evaluated based on:

- Technical Capability (30%): Architecture quality, technology choices, scalability approach, design implementation expertise
- Experience (25%): Demonstrated success with similar platforms, portfolio quality
- Project Approach (20%): Methodology, timeline realism, risk management
- Cost Structure (15%): Value for investment, transparent pricing, payment flexibility
- Team Expertise (10%): Qualifications, availability, communication capability

## 5. SUBMISSION GUIDELINES

### 5.1 Submission Requirements

- Proposals must be submitted in PDF format via email to [projects@markandcomm.com](mailto:projects@markandcomm.com)
- Subject line: "RFP Submission - Multi-Vendor Platform - [Company Name]"
- File naming convention: `CompanyName_MVPlatform_RFP_2026.pdf`
- Maximum proposal length: 25 pages (excluding appendices)

### 5.2 Submission Deadline

May 20, 2026 at 4:00 PM Sri Lanka Standard Time

Important: Proposals will be reviewed on a rolling basis. The opportunity may be filled before the deadline if a submission closely matches our requirements. Early submission is encouraged.

Late submissions will not be accepted unless prior arrangements have been made.

### 5.3 Questions and Clarifications

Questions regarding this RFP should be submitted via email to [reach@markandcomm.com](mailto:reach@markandcomm.com) by May 10, 2026. Responses will be shared with all prospective bidders to ensure fairness.

UI/UX design files will be shared with only the awarded vendor under NDA for detailed technical assessment, once engaged.

## 6. TERMS AND CONDITIONS

- Mark & Comm (Pvt) Ltd and the client reserve the right to accept or reject any or all proposals
- Mark & Comm (Pvt) Ltd and the client reserve the right to negotiate terms with selected vendors
- Submission of a proposal does not guarantee project award
- All submitted materials become property of Mark & Comm (Pvt) Ltd and the client
- Vendors must maintain strict confidentiality regarding all project details
- Mark & Comm (Pvt) Ltd may request presentations or demonstrations from shortlisted vendors
- Selected vendor will be required to sign a comprehensive development agreement and NDA
- Complete UI/UX design files remain the intellectual property of the client
